PHARMACY RESOLUTION GUIDE

The Pharmacy Resolution Guide is intended to provide office staff with helpful information when they encounter callback issues from the pharmacy.

PROACTIVELY ADDRESS THE 3 MOST COMMON REASONS FOR A PHARMACY CALLBACK

1. COVERAGE

“The prescription isn’t covered.”

- Was the insurance card run?
- What are you hearing from the patient?
- What do you show for the drug benefit plan? Is it commercial?
- Do you take their drug benefit plan? Or are you just running their medical insurance?
- Was the Bausch + Lomb Access Program copay card run?

2. COST

“The medication prescribed is too expensive.”

- Was the insurance card run?
- Did you provide a Bausch + Lomb Access Program copay card?
 - If yes, what cost was quoted?
- For VYZULTA, is the price being quoted for a 30-60-90-day supply?

Scan this QR code for VYZULTA Access Program support and resources, including PA support and Medical Necessity or Tier Exception forms

3. AVAILABILITY

“The medication prescribed is not in stock/unavailable.”

- Can the prescribed product be ordered and sent to the pharmacy?
 - If so, when can it be delivered?
- Can you check availability at another pharmacy?
- Can you send to another pharmacy?
